

Introducing InetOffices

Taking your office
Virtually
Anywhere!

What is a Virtual Office?

In short, a virtual office is just as the name implies. It is an environment that is accessed via the Internet which houses all of your day to day applications, data, and all the tools you need to be productive at what you and your company do best.

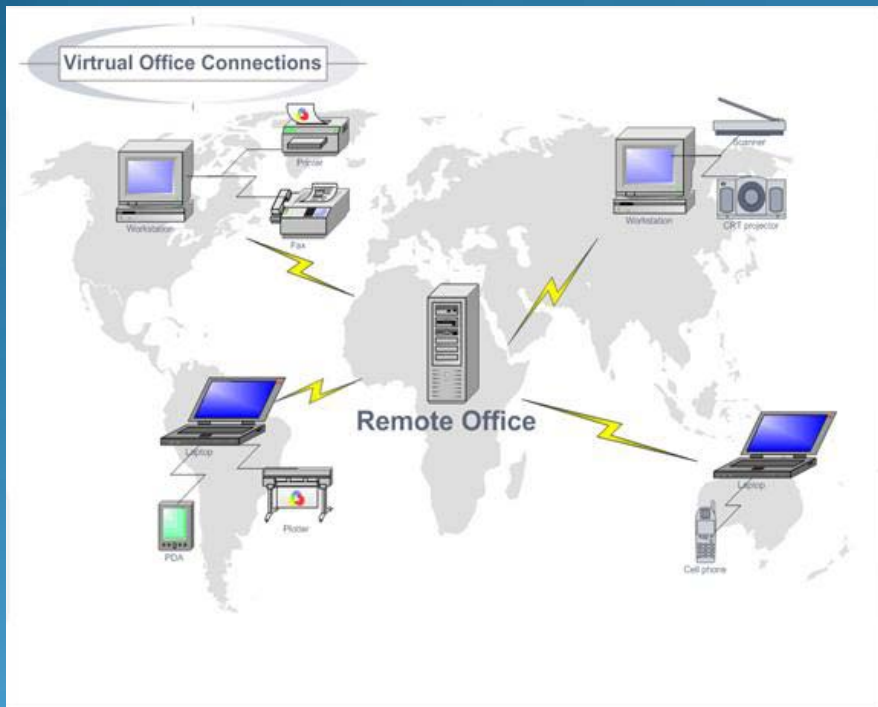

What is offered in the Virtual Office?

- Email
- Voice
- Fax
- Security
- Internet
- Applications
- Web

What are the advantages of a Virtual Office?

InetOffices gives you the flexibility of offering all of today's technologies for one monthly price allowing you to get what you need now, but grow as you grow.

You can *virtually* take your office anywhere.

Virtual Office – Data Center

Regulated power (full back up), a high bandwidth Internet connection, physical and network security, 24x7 monitoring, and full technical support

InetOffices is located in a secure data center. A data center is essentially a computer room that allows storage and management of servers, networks and other computer equipment in a controlled environment.

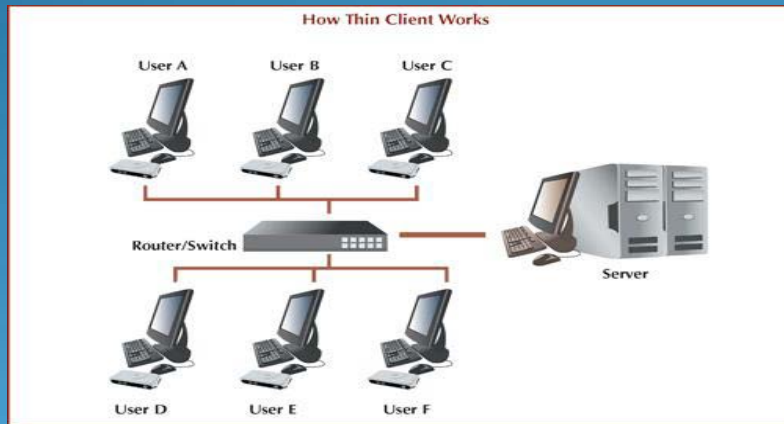

Virtual Office - VoIP

InetOffices offers VoIP*. The technology of tomorrow is here today and it's going to replace your old telephone system and improve the way you do business.

*Service offered through BroadRiver Communications

Virtual Office – Thin Client

InetOffices offers thin clients* for your conduit to your virtual office. A thin client is a diskless computer that accesses applications on a remote resource (server).

*Leased or purchased through BroadRiver Communications

How much does it cost?

InetOffices is very affordable for any budget.

Some common examples are listed below.

Allowing your users to have a thin client, phone, internet access, email, web site, and a secure desktop work experience including Microsoft Office applications

5 Users - \$698.05 per month (\$139 per user)

10 Users - \$1172.30 per month (\$117 per user)

15 Users - \$1537.40 per month (\$102 per user)

15 User example

Below is an example of the 15 user InetOffices Package (15 Users - \$1537.40 per month)

- Terminal Server desktop [Environment]
- 15 Cisco phones [Voice]
- 1 Fax to email account [Fax]
- T1 Internet [Connectivity]
- Microsoft Office Applications [Applications]
- 1 Web Site [Web]

About BroadRiver

BroadRiver provides a complete line of quality, reliable voice and data services designed for growing businesses. Our in-house consultants leverage the innovation of trusted partners such as Cisco to deliver a full range of customizable services -- helping you get the most value from your business communications. A personal approach and dedication to customer service ensure that when you need customer support, your account manager is accessible and responsive and knows your business needs, not just your customer number.

Convenient, reliable full line of products and service-BroadRiver is the actual service provider, not a reseller, so our customers can get a full range of voice, data and hosting needs from one source at a price that is more competitive than most telecommunications service providers.

Packages that are customized for you, without the premium price tag-BroadRiver combines the best of both worlds-a full selection of products and services that can be customized to your needs with prices for our bundled services that are typically less than our competitors. Your package contains just the services you need and you don't pay a premium for not fitting into one of our "boxes."

About Southern Data

Who we are...

Southern Data Solutions is a technology company focusing on business solutions. With many years of experience, we are dedicated to provide full consultation and implementation of high quality products at competitive prices backed by highly trained, motivated personnel performing the level of support desired. We believe that a local dealer, authorized and trained by such companies as Microsoft, Cisco, and HP can best serve the needs of businesses.

What we do...

On-site consultation to offer business solutions to existing or new LAN/WAN technology. Implementation of all hardware, software and other networking products. Provide service contracts for both onsite and remote administration.

Our pledge...

We Pledge to serve our customers to our fullest potential. We Pledge to dedicate the time and resources to our customers and their needs. We Pledge to answer your call or email and respond in a timely manner.
